

RJE LAMINATOR

A Product Of

Builders Of Machinery For Industry Since 1981

FEATURES:

- Oversized (8") Applicator Roller
- Oversized (8") Interchangeable Hold Down Roller
- Variable Speed Drive
- 36" Feed Table
- Mounted On Casters
- Extra-Large Glue Pan
- Easy Raise/Lower Jack For Glue Pan
- Drain The Glue Pan Into A Five Gallon Bucket
- Chrome Plated Applicator Roller
- Chrome Plated Hold Down Roller
- Rubber Covered Metering Roller

The RJE Laminator is specifically designed for heavy-duty sheet-to-sheet laminating of the heaviest materials. Rugged, all-steel construction yields long-life and dependability. Standard features include: over-size (8") glue applicator roller and hold down roller, extra large, removable glue pan, easy-to-use single-end jack handle to raise and lower the glue pan, extra high clearance for the glue pan to allow the pan to be drained directly into a five-gallon bucket, and a large 36" infeed table.

The applicator roller is grooved for both bead and film application of glue, and as an added feature, the hold-down roller is interchangeable with the applicator roller to allow film-only application, or Michelman coating to be performed on the same machine!

The quiet, smooth running gear belt drive is virtually maintenance free, and is isolated from the glue line to minimize cross-contamination and build-up. The smooth-running AC motor is variable speed, and the motor is remote mounted on the side of the machine for easy access and to keep it clear of glue build-up and damage.

The hold down roller independently adjustable on each end, as is the rubber-covered metering roller, allowing for precise control of both the amount of glue and the pressure on the paper. Standard capacity for the machine is 1" thick material, and can easily be manufactured to take up to 6" thick material.

A safety interlocked infeed guard is standard, as are the free-moving swivel casters to position the machine where it is needed. Available in virtually any width, the RJE Laminator is a profitable addition to any plant, no matter the size.

The Advantages Of Buying An **American** Made **Product**

At RJE, we often see companies investing in products from overseas because they are half the price as that of American made products. The issue with this is, you are getting everything for half the price: the quality, the parts, and the attention and service you so desperately need when your machine is failing to produce! Can you really afford this? Remember the old adage:

“You get what you pay for!”

Why buy from RJE, an American company? At RJE, we couldn't be more proud in what we manufacture. Our machinery is made of heavy-duty construction, the highest quality parts, the highest technology available, and most of all it is all backed up by the highest quality of attention and service around!

So, before you purchase from overseas, call us, we would like the opportunity to compare.
