

# RJE 120" Four Bar Slitter

A Product Of

Builders Of Machinery For Industry Since 1981

## KEY FEATURES:

- 120" Shaft Face
- Chrome Shafts
- Industry Standard 6" Diameter Shafts
- Illuminated Set-Up Area
- Fully Guarded With Electrical Interlocks On All Guards
- Whisper-Quiet Belt Drive
- Retracting Tape Measures Over Both Top Shafts For Ease Of Set-Up
- Heavy-Duty, Spherical Roller Bearings For Long Life
- Heavy-Duty, Welded Steel Construction

The RJE 120" Four Bar Slitter is solid, American made equipment, designed for ease of operation and engineered for performance.

Furnished with six sets of 8.75" O.D. x 6.00" I.D. scores and four sets of trim heads for three-out operation, our equipment incorporates readily available components.

## Accessible Design

The extra deep 48" feed table gives a good working area because of the T-Slot design as well as the elimination of awkward side braces. Fast and easy set-ups are made in the well lighted and conveniently guarded shaft area which features tape measures located above both top shafts allowing easy set-up of knives and scores. Shafts are easily exposed and rotated by the remote hand wheel with no restrictive bars or braces to get in the way.

## Precise Performance

Reliable, quality performance is the result of experienced engineering. Precision ground, chrome shafts produce uniformity and are mounted in self-aligning, heavy duty spherical roller bearings. A constant parallel is maintained in the adjustment since each shaft end moves exactly the same amount. Shafts are adjustable independently.

Performance with minimum down time is a necessity. All bearings and wear surfaces are equipped with easily accessible grease fittings. The lubricated bearings and timing belt drive result in less service and maintenance. Perfect synchronization results in no heat build-up, lower bearing loads, long life and less down time.

# RJE RJE 120" FOUR BAR SLITTER

# SPECIFICATIONS

- Maximum Sheet Capacity: 120" Max. Trimmed Sheet
- Shaft Diameter: 6"
- Score Diameter: 8.75"
- Slitter Knife Diameter: 9" O.D. x 6.625" I.D.
- Weight: 7,000 lbs.
- Operating Speed: 425 Feet Per Minute
- Drive: 3HP, 230/460 Volts Three Phase
- 2" Wide Dual-Faced Gear Belt Drive
- Eight Foot Fluorescent Light Mounted Above Shaft Area
- Upper Frame Is A Conveniently Located Shelf For Storage

The RJE 120" Four Bar Slitter from the operator end, outfeed side of the machine.

## The Advantages Of Buying An American Made Product

At RJE, we often see companies investing in products from overseas because they are half the price as that of American made products. The issue with this is, you are getting everything for half the price: the quality, the parts, and the attention and service you so desperately need when your machine is failing to produce! Can you really afford this? Remember the old adage:

*"You get what you pay for!"*

Why buy from RJE, an American company? At RJE, we couldn't be

more proud of the products we manufacture. Our machinery is made of heavy-duty construction, the highest quality parts, operated by the highest technology available, and most of all it is all backed up by the highest quality of attention and service around!

So when deciding on your next long term investment for your company's future, before you purchase call us, we would like the opportunity to present why our machinery and service is superior to those from overseas!
