

SAG-4000

Semi-Automatic Cold Set Gluer

A Product Of

Builders Of Machinery For Industry Since 1981

KEY FEATURES:

- 96" Throat
- Use PVA Water-Based Glue
- Automatic Compensation From Single-Wall To Double-Wall Corrugated
- Glue Wheel Crushes Tab
- Variable Speed Glue Wheel
- 110 Volt Power - Plug In Anywhere
- Anyone Can Run With A Minimum Of Training
- 48" From The Center Of The Glue Flap To The Right - Unlimited To The Left

The RJE SAG-4000 Semi-Automatic Gluer is specially designed to glue unusual design corrugated cartons.

Utilizing a glue wheel instead of extrusion, the SAG-4000 head crushes the glue flap while applying the glue. This results in a more uniform stack of cartons for strapping and shipping. The unique staging action compression section indexes the boxes as they are glued, increasing compression time for glue cure while allowing the compression deck to take up only nine feet of floor space.

The 96" throat will accommodate up to a 192" unfolded blank, but is still versatile enough to handle the

smallest die cuts. The easy-to-use guide is the only setup required to change boxes.

In addition, the SAG-4000 will glue inside or outside glue laps with no changeover! This versatile gluer uses 110 Volt AC power, so it can be used anywhere in your plant with simply an extension cord.

NEW! The new open-throat design of the SAG-4000 Gluer allows for even larger boxes to be glued without requiring additional floor space!

The SAG-4000 Glue Head showing the easily removable glue pan.

The SAG-4000 Compression Deck featuring unique staging action for added compression time in a small area.
