Made in America by RJE Machinery, Inc., the Scorpion is manufactured to meet the demands brought about by short to medium run orders. The Scorpion produces corrugated partitions or cartons from raw corrugated stock with the ability to print on them. All at an affordable price!

SPECIFICATIONS:

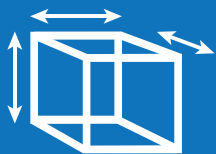

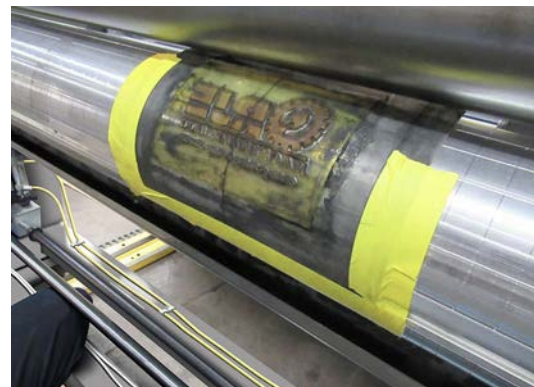

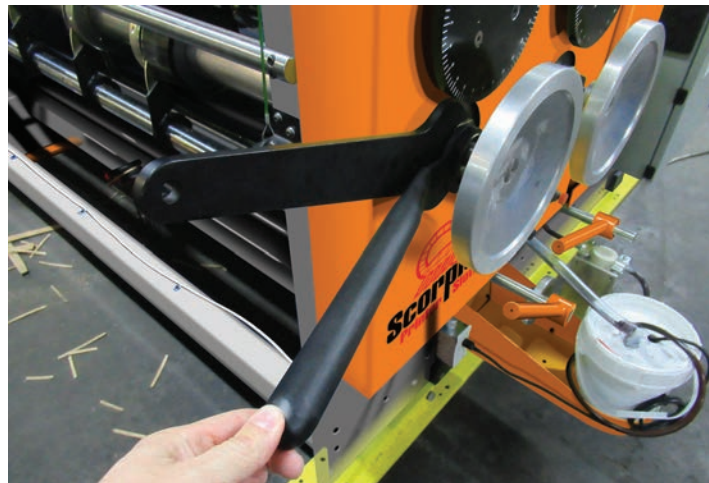

- Maximum Sheet Size: 23-1/2" x 70"
- Minimum Sheet Size: 8" x 16"
- Minimum Width Panel: 2"
- Manual Register
- Maximum Speed: 5,000/Hour
- Motorized Frame Opening
- Laser Engraved Anilox Roll
- Air Bladder Blade Metering System

TOOLING:

- 4 Slots, 4 Scores, 2 Trim

Also Available: Tab Cut Head
Hand Hold Tooling

Small Physical Footprint

The Scorpion takes up less space compared to larger run machines and can easily be placed within the confines of your floor space.

Designed to set directly on a standard 4"-6" concrete floor, the Scorpion does not require expensive foundation work to be properly operated in your facility.

Each of the four sections run on a track so that they can be separated for ease of operation, setup, and maintenance. (See back page)

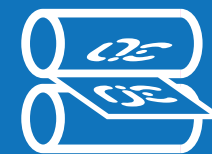

Ease of Setup & Maintenance

The Scorpion is mechanical in design and all settings are standard manual type adjustments. This allows for easy setup and maintenance.

Also to assist in the ease of operation and maintenance the Scorpion comes in four sections so each station can easily be set up and maintained.

- 1. The Feeder
- 2. The Print Station
- 3. The Slotter
- 4. The Outfeed Conveyor (up to 3)

Print Capable

The Scorpion is designed to operate with up to three print stations (may be added at any time) to allow the machine to grow with your needs.

Each printer features aluminum print cylinders with die mounting systems included, making the machine versatile and easy to set up.
