

COMPU-SIZE

55"-84"-103" Conversion

A Product Of

Builders Of Machinery For Industry Since 1981

KEY FEATURES:

- No More Sliding Scales
- No More Limit Switches
- Auto-Set Of The Width And Depth Scores
- Box Data Memory
- Built-In Ethernet Hub
- Alphanumeric Part Number Storage
- Servo Motor Control of Paper Positioning!
- Keyless Drive System To Reduce Wear

RJE Machinery, Inc. is proud to present our popular boxmaker control system - the Compu-Size Conversion. The Compu-Size Conversion replaces the control system on existing boxmakers with a computer control system.

Once the control system is replaced, the old electro-mechanical switches are no longer needed. These switches are the source of most of the accuracy problems on the older series boxmakers as well as the largest maintenance cost associated with these machines. With the removal of these switches, the machine is easier to operate and much easier (and less expensive) to maintain.

As an added benefit, the Compu-Size controls the placement of the width and depth scores and slots automatically, speeding up the set-up errors. The Compu-Size controls the placement of the scores via encoders, allowing the scores to move to the correct position while the operator is setting the infeed table guides.

The Compu-Size utilizes a touch screen for data entry, making interfacing with the machine quick and easy. In addition, the Compu-Size comes equipped with an Ethernet hub, allowing the machine to become a node on the company intranet by simply attaching an Ethernet cable.

The Advantages Of Buying An **American** Made **Product**

At RJE, we often see companies investing in products from overseas because they are half the price as that of American made products. The issue with this is, you are getting everything for half the price: the quality, the parts, and the attention and service you so desperately need when your machine is failing to produce! Can you really afford this? Remember the old adage:

"You get what you pay for!"

Why buy from RJE, an American company? At RJE, we couldn't be more proud in what we manufacture. Our machinery is made of heavy-duty construction, the highest quality parts, the highest technology available, and most of all it is all backed up by the highest quality of attention and service around!

So, before you purchase from overseas, call us, we would like the opportunity to compare.

Touch Screen Control

The Compu-Size conversion features touch screen control for easy setup and intuitive control. All box settings are easily changed from the main run screen. Interactive indicators alert the operator to changes as well as the production rate of the machine and the order count.
